PLACERING I BREDDEN

Hold den valgte kassette til venstre eller højre på rammen (ved en dobbeltdør til venstre og højre).

Placer kassetten på rammen (maksimalt 58 mm overlappende), så håndtaget kan betjenes fra bagsiden.

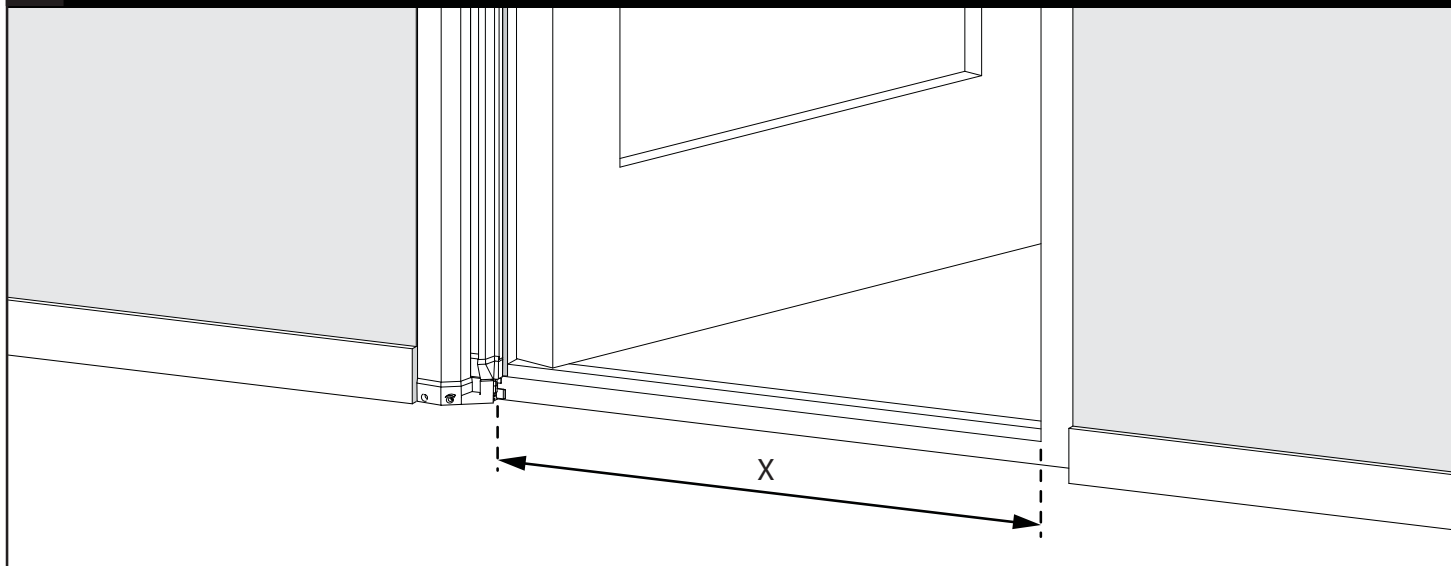

PLACERING I HØJDEN

Monter kassetten så lavt som muligt, men hold mindst 2,5 cm overlap på både nederste og øverste del af rammen til montering af skinnerne. Hvis den nederste del af karmen er mindre end 2,5 cm, skal du installere en påfyldningsliste.

6a

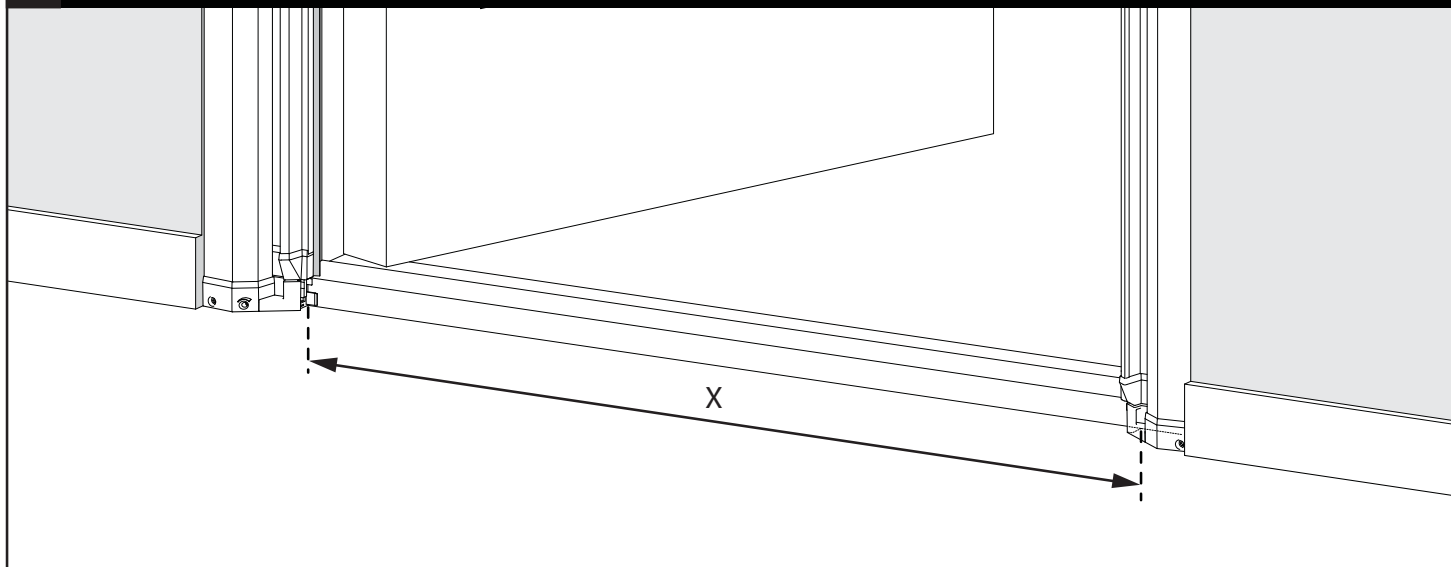

ENKELT DØR

Skinnernes længde 'L' er $X + 10 \text{ mm} = \dots\dots\dots \text{ mm}$

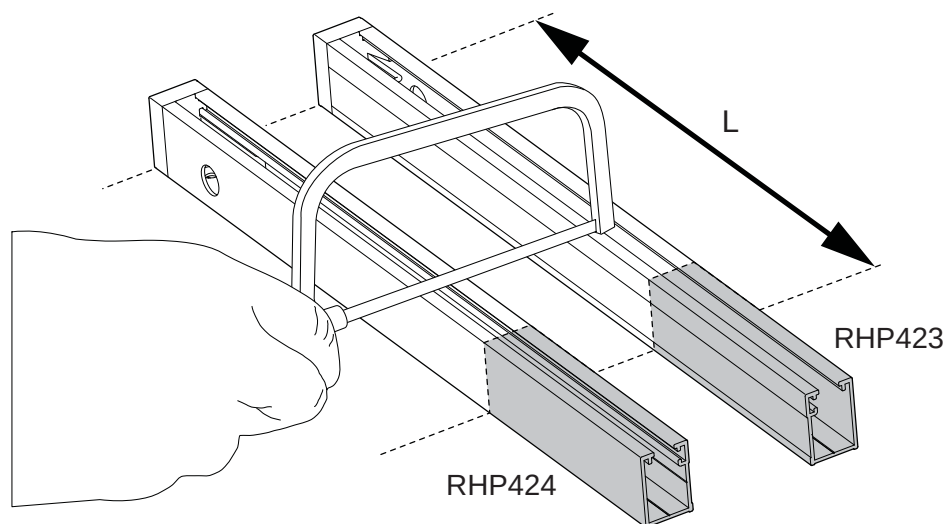

6b

DOBBELT DØR

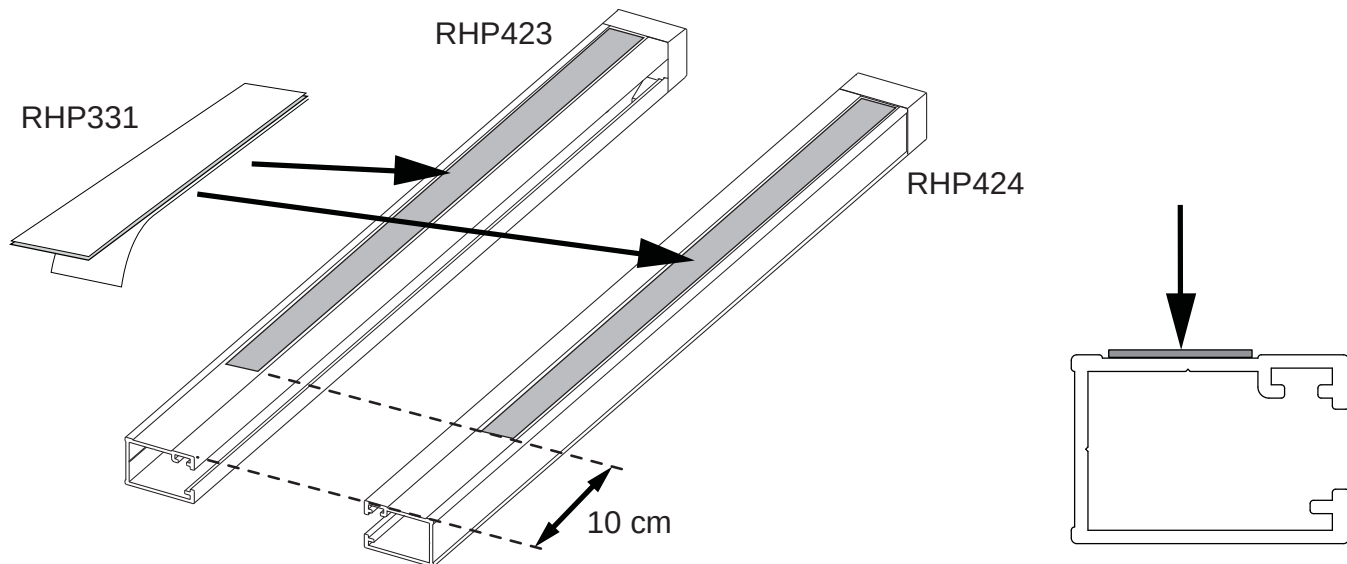

Skinnernes længde 'L' er $\frac{1}{2}X = \dots\dots\dots \text{ mm}$

7

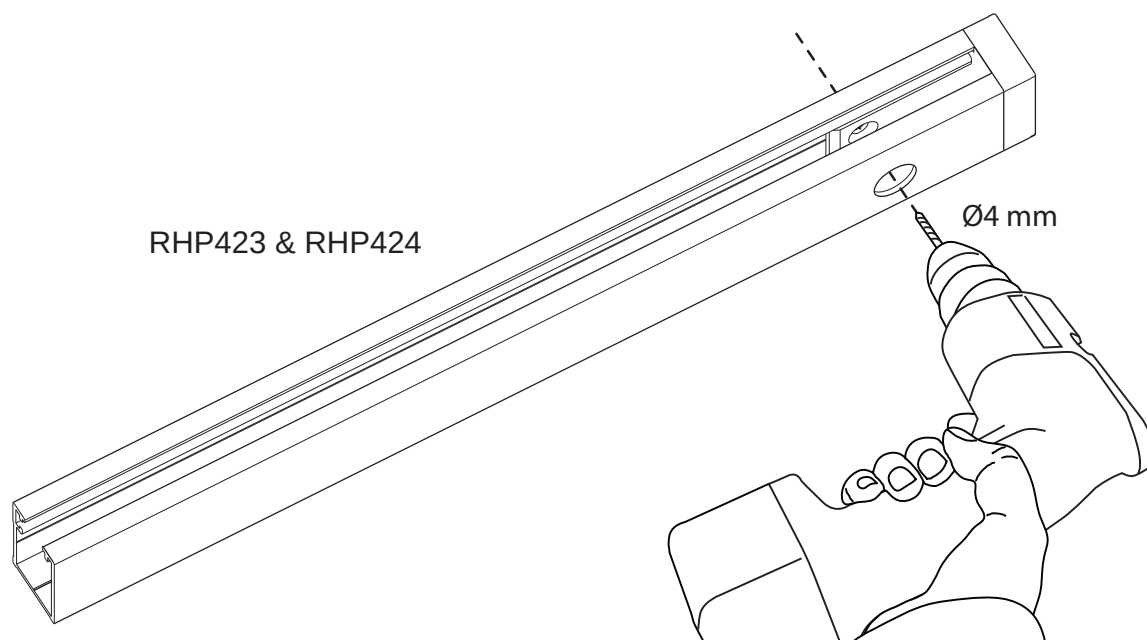

Når du skærer, skal du sørge for, at du beholder den lukkede side af profilen.

8

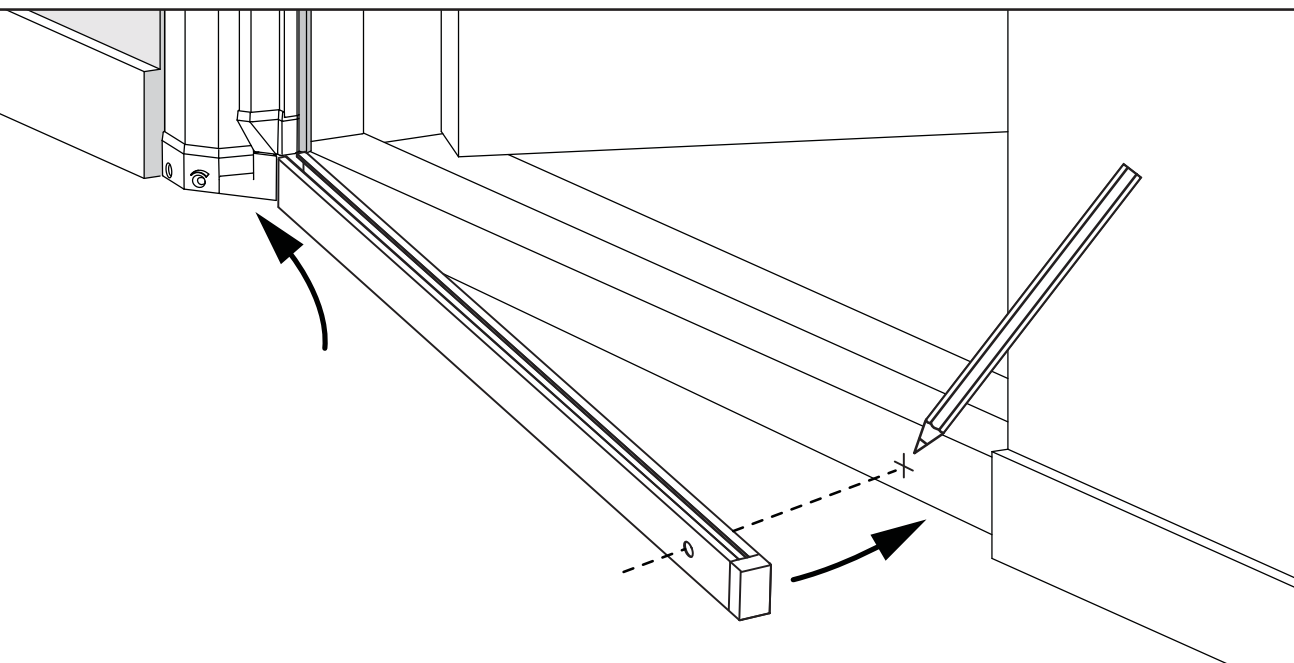

Ryd profilen og vinduesrammen for fedt. Sæt tapen på profilen og lad det beskyttende lag sidde.

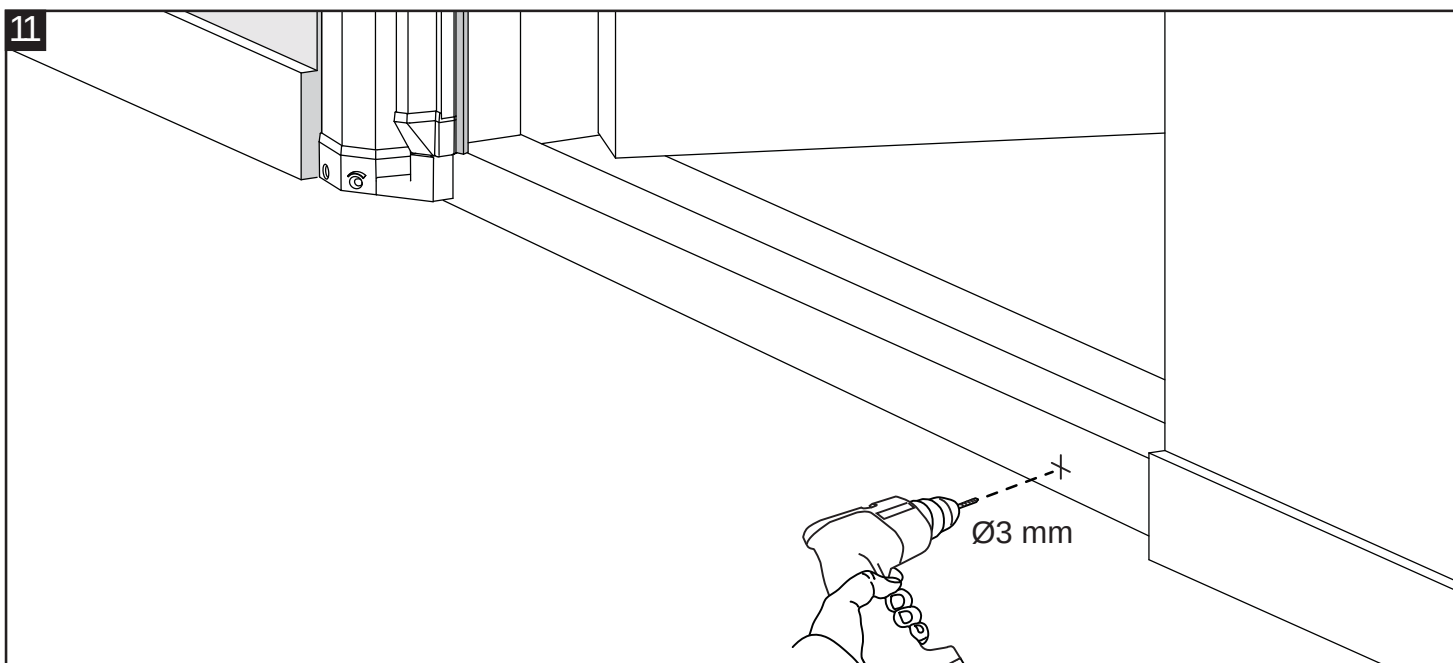

9

13

Brug Ø3,5x16 mm skruen til at bestemme den nøjagtige position til skinnen, før du skubber den mod rammen.

Monter den øverste skinne på samme måde som den nedre skinne (trin 10 til 14).
 For at rulleddøren fungerer korrekt er det meget vigtigt, at skinnen forned og foroven er parallelle.
 TIP: Brug grebsstangen (1) til at bestemme den øverste skinnes position (2) og til at aftegne (3).
